

Fiberglass Products

Affordable, Low-Maintenance, Corrosion Resistant, Weather-Proof

Fiberglass Shelter

Fiberglass shelters provide the perfect solution for protecting chlorination and de-chlorination equipment from environmental elements, therefore enhancing the life of equipment.

Fiberglass Enclosures are corrosion resistant, weather-proof, low-maintenance, and affordable.

Fiberglass Enclosure

- Protects against corrosion, and environmental elements
- Designed to house electrical and electronic controls & instruments

Fiberglass Door

- Corrosion resistant
- Maintenance Free
- Easy to install
- Light weight
- Shock Resistant
- Tough

Fiberglass Flumes

- Molded one piece construction
- Corrosion Resistant
- Easy installation, light weight, high strength
- Rugged Construction
- Range of sizes and options

Fiberglass Manholes

- For sewer and electrical service

Fiberglass Wet Wells

- Variety of sizes available from 30" diameter to 144" diameter, and depths to 40"
- Heavily Reinforced bottoms, hold down rings, and open flanged tops

Applications:

- Valve Vaults
- Lift Station
- Basins
- Rehab Liners

Fiberglass Pump & Equipment Covers

- Easy and rapid installation
- Designed to be used in areas of corrosive chemicals & high humidity
- Several sizes and colors available
- Optional insulation

Fiberglass Vessels

Pressure vessels for :

- Scrubbers
- Dechlorinators
- Other Specialized services

Fiberglass Tanks

- Vertical Cylindrical Sidewalls
- Domed, flat or open tops
- Flat, dishd, or cone bottoms
- Custom rectangular tanks for corrosive applications
